

IT'S TIME TO SIMPLIFY. IT'S TIME TO UNIFY.

IT'S TIME FOR MERIDIAN, IBM, AND AVAYA.

Yesterday, people went to work. Today, work comes to people. Organizations in all sectors of business and government are struggling to enable workers to be productive in more places and at more times. To help organizations take that first step, Meridian has created solutions that will bring technology from two of the world's leading companies together into an easy to buy, easy to implement, effective Unified Communications and Collaboration solution for you.

Meridian offers two bundles to help you take that first step onto a Unified Communications and Collaboration road:

EXPERTISE LOCATION SERVICES FEATURING PRESENCE AND CLICK-TO-CALL

The benefits of integrating communications grow as collaboration and process integration increase. One of the most time-wasting tasks in any organization is finding who the expert is within the organization that can help a worker or customer. Even if that expert is known, the ability to efficiently locate and interact with that expert can be problematic. To address this, Meridian has created a solution that contains everything an organization needs to find who the expert is, locate that person, know if that person is available to help, and choose from a range of interaction options that best fit the task. This bundled solution is for 500 people, and contains:

- 500 IBM Lotus Sametime Advanced User Licenses
- 500 IBM Lotus Connections Profiles User Licenses
- 500 Avaya Unified Desktop Licenses
- 1 Avaya AES Server
- UC² Network Readiness Assessment
- Complete Implementation Services

Bundled Price: \$182,575.00*

UNIFIED TEAM MEETINGS

Does this sound familiar? "Who is that speaking?" "Who is that going through a drive-thru? Can you please mute your line?" These are very common barriers to effective web conferences and teleconferences. With Meridian's Unified Team Meeting bundle, we can help you to avoid those problems in the future, and instead focus on doing business. The key lies with the tight integration of the Avaya audio conference bridge with the IBM Lotus Sametime web conference. This integration extends to the Outlook and Lotus Notes clients, allowing you to schedule both web and audio conferences right from your calendar application, and then join those web and audio conferences when the time arrives. This bundle is designed for 1000 user organizations, and contains:

- 1000 IBM Lotus Sametime Standard User Licenses
- 1000 Avaya Meeting Exchange Sametime Adapter User Licenses
- UC² Network Readiness Assessment
- Complete Implementation Services

Bundled Price: \$147,500.00*

*Each bundle has certain prerequisites. In addition, some customers may already be entitled to some of the software in the bundles. Email Meridian at uc2bundles@meridianitinc.com or visit <http://www.onlinemeridian.com/content.aspx?id=4136> for more information and find out if you can qualify for a discount of 20% or more off of the price of the bundles.

ABOUT MERIDIAN GROUP INTERNATIONAL, INC.

Meridian Group is a commanding collection of six companies worldwide that include Meridian IT Inc. and MAC Source Communications. Combined, Meridian boasts more certified partnerships with leading IP telephony providers than any other IBM Premier Business Partner, uniquely positioning us to help you integrate all of your communications, regardless of your telephony platform.
